

# Dekart Private Disk Quick Start Card

**Dekart Private Disk is a simple and safe tool to protect confidential information on your PC from unauthorized access.**

## System Requirements

- Workstation running a Windows\* operating system
- CD-ROM drive
- 3 MB of free disc space for the product installation

### If smart cards are used:

- Smart card reader complying with the PC/SC specifications.
- One of the following ports available:
  - 9 pin COM port
  - 25 pin COM port + adapter
  - PS/2 port + adapter
  - USB port
- One of the following operating systems:
  - Windows 95
  - Windows 98
  - Windows Me
  - Windows NT\* 4.0 Workstation with Service Pack 6a
  - Windows 2000 Professional with Service Pack 2 SP2
  - Windows XP Professional

### If the eToken\* keys are used:

- USB port available
- One of the following operating systems:
  - Windows 95 OSR2.1
  - Windows 98
  - Windows Me
  - Windows NT 4.0 Workstation with Service Pack 6a
  - Windows 2000 Professional with Service Pack 2 SP2
  - Windows XP Professional

## Preliminary Requirements

### If smart cards are used:

- Smart card reader drivers and tools. Their latest versions can be downloaded from the Web sites of respective vendors.

### If the eToken keys are used:

- The *RTE* with drivers and utilities. The latest version can be downloaded from <http://eAladdin.com>.

### For Windows 95 OSR2.1/98/NT:

- The *Microsoft\* Windows Installer (MSI)* tool for the *RTE* installation. It can be downloaded from <http://support.microsoft.com/downloads/>.

## Auxiliary Components Installation (if required)

### If smart cards are used:

#### Smart card reader driver installation

1. Insert the *Dekart Private Disk* product CD into the CD-ROM drive.
2. Select *Smart card reader driver installation* from the menu.
3. Attach the reader to the computer.
4. Follow directions on the screen.

### If the eToken keys are used:

#### The eToken RTE installation

1. Under Windows 95/98/NT operating systems, install the *MSI* tool.
2. Insert the *Dekart Private Disk* product CD into the CD-ROM drive.
3. Select *Install the eToken RTE* from the menu.
4. Follow directions on the screen.
5. Under Windows NT, reboot the computer to utilize the *eToken*.

## eToken Installation

(if required)

1. Insert the *eToken* into the USB port.
  - Under Windows 95/98/Me/2000/XP, installation is carried out automatically. Wait until it is completed. No actions are required.
  - Under Windows NT 4.0, the *eToken* is installed during the previous step. No additional actions are required.
2. Check whether the *eToken* workstation installation is correct:
  - *eToken* LED indicator must start glowing.
  - One or several *Aladdin IFD Handler* drivers and one or several *eToken* devices must appear on the workstation hardware list.
  - An incorrectly attached or out of order *eToken* is not on the list. Re-install it, or refer to the Dekart, Inc. technical support service.

## Dekart Private Disk Installation

1. Insert the *Dekart Private Disk* product CD into the CD-ROM drive.
2. Select *Install Dekart Private Disk* from the menu.
3. Follow directions on the screen.

## Dekart Private Disk Update

1. Insert the *Dekart Private Disk* product CD into the CD-ROM drive.
2. Select *Install Dekart Private Disk* from the menu.
3. Follow directions on the screen.
